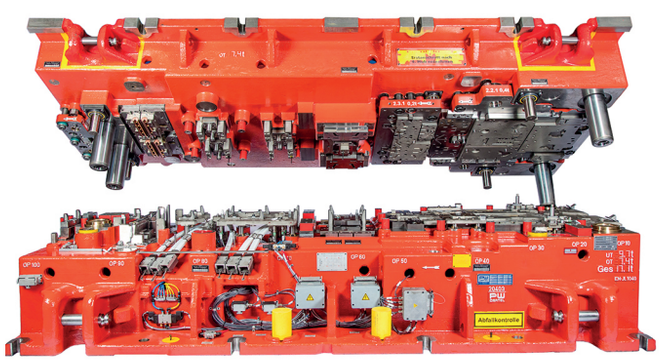
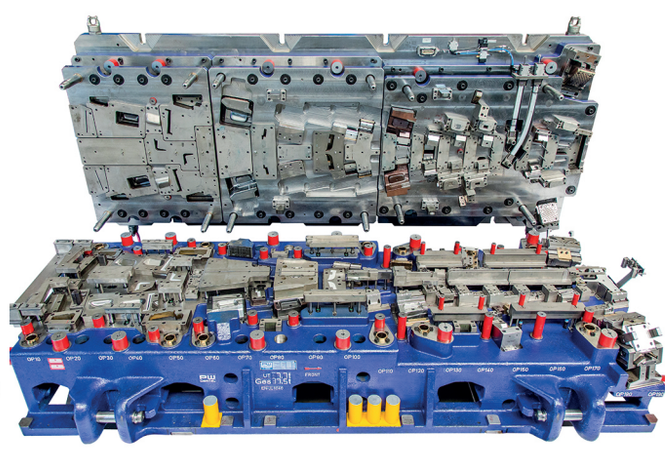
GESCHÄFTSFÜHRUNG/ MANAGEMENT Herr Ralf Talke (Geschäftsführer), Herr Daniel Oertel (Geschäftsführer)
MITARBEITER/EMPLOYEES 50-99
UMSATZ/TURNOVER 10-50 Mio. €
EXPORT <10%
ZERTIFIKATE/CERTIFICATES ISO 9001:2015

STATUS Finalist | eigene Forschung/Entwicklung
PRODUKTE Schnitt- und Stanzwerkzeuge | Verbund- und Folgeverbundwerkzeuge | Transferwerkzeuge
ABNEHMERBRANCHEN Maschinen- und Anlagenbau
FORSCHUNG UND ENTWICKLUNG 2D/3D-Messtechnik | Blechbearbeitung | Prototypen- und Kleinserienfertigung | Prozesssimulation | Prozess- und Produktoptimierung | Umformsimulation | Umformtechnik | Verbindungstechnik | Werkzeug- und Formenbau
KURZPROFIL Die Firma Pockauer Werkzeugbau Oertel GmbH ist ein mittelständiges Unternehmen, welches sich mit seinen über 90 Mitarbeitern auf die Entwicklung, Herstellung und Inbetriebnahme von komplexen, mittelgroßen bis großen Folgeverbund- und Transferwerkzeugen spezialisiert hat. Schwerpunkt des Unternehmens ist die Herstellung komplizierter Blechumformwerkzeuge für die Automobilindustrie. Die Werkzeuge erreichen dabei Abmessungen bis 7.000mm und werden auf Pressen mit bis zu 3.000to Presskraft eingesetzt. Beginnend mit der Simulation, Entwicklung, Konstruktion bis hin zur Anfertigung und Tryout können alle Arbeitsschritte im eigenen Hause ausgeführt werden.
REFERENZEN namenhafte Automobilhersteller sowie deren Zulieferer wie beispielsweise aus den Bereichen Scharnier- und Sitztechnik sowie Antriebsstrang, Verstärkung und Karosserie




STATUS Finalist | Own research/development
PRODUCTS Cutting and punching tools | Progressive and follow-on dies | Transfer tools
INDUSTRIES Mechanical and plant engineering
RESEARCH AND DEVELOPMENT 2D/3D measuring equipment | Sheet-metal working | Prototype and small-lot production | Process simulation | Process and product streamlining | Metal-forming simulation | Metal-forming | Connecting technology | Tool manufacture and mould making
SHORT PROFILE Pockauer Werkzeugbau Oertel GmbH is a medium-sized company with more than 90 employees specializing in the development, manufacture and commissioning of complex, medium to large progressive and transfer dies. The main focus of the company is the production of complicated sheet metal forming tools for the automotive industry. The dies reach dimensions of up to 7,000mm and are used on presses with up to 3,000to pressing force. Starting with simulation, development, design up to manufacturing and tryout, all work steps can be carried out in-house.
